UI/UX
LAB ASSIGNMENT- 01

Aim: critical analysis of interfaces.

Theory: website usability analysis is the process of evaluating websites based on user experience parameters. 3 our healthcare websites - Img, Pharmeasy, eSanjeevani and Apollo 24|7 were compared based on learnability, usability, consistency, navigation, visual hierarchy, accessibility, responsiveness, feedback, personalization and other factors.
Each website was given score out of 10 with justification based on its feature and ease of use. The comparison helps identify strengths and weakness such as easy searching, clear information, simple navigation, advertisements and personalized recommendation. The average scores were used to compare the overall usability of websites.

Conclusion: The analysis shows that Img and Pharmeasy offer a user-friendly experience Apollo 24|7 also performs well while eSanjeevani needs improvement in navigation personalization and interface simplicity. Overall, simple design and easy navigation improve user satisfaction.
