UI/UX
LAB ASSIGNMENT - 03

Aim : To create wireframes and design screens.

Theory : The healthcare+ application is designed to provide easy access to healthcare services through a simple mobile interface. The paper prototype contains seven screens : Home Page, login / sign up, Dashboard, Find a doctor, Book consultation, medicines and profile.
The homepage page provides search options and quick access to healthcare services. The login / sign-up screen allows users to enter their mobile no. or create an account. The Dashboard displays recommended doctor, medicine options and upcoming appointments. The Find a doctor screen helps users search for doctor and choose specialities. The BOOK consultation screen allows users to select a doctor, date, available time and consultation type. The medicines screen provides medicine search, categories and recommend products. The profile screen provides access to appointments, prescriptions, medical records, settings and support.

Conclusion : Paper prototype was designed successfully with seven screens. It provides
