UI/UX
LAB ASSIGNMENT - 04

Aim: To create an interactive prototype.

Problem statement: Create an interactive prototype to simulate the final products using figma.

Theory: The healthcare+ mobile application is designed to help users manage their healthcare needs through simple and user-friendly interface. The application consists of seven main screens connected to provide a smooth user experience.

1. Home screen - Provides quick access to doctor, medicines, appointments and prescription.
2. Login / sign-up - Displays health information, upcoming appointments and recommended services.
3. Dashboard - Display health information, upcoming appointments
2. Login / sign-up - Allows users to log in or create an account.
3. Dashboard - Display health information, upcoming appointments and recommend services.
4. Find a Doctor - Helps users search for doctor by name or speciality.
5. Book consultation - Allows user to select a date, time and consultation mode.

Date :
Page No.

6. Medicines - Enables users to search and explore medicine.
7. My Health profile - Provides personal details, medical history, appointments and health records.

Interactive navigation - All screens are connected through clickable buttons and links allowing users to navigate smoothly b/w healthcare services.

Conclusion: The Healthcare+ provides an integrated healthcare experience by combining doctor appointment booking, medicine browsing and personal health management in one mobile application.
