UI/UX
LAB ASSIGNMENT - 05

Aim: To evaluate the usability of telemedicine management system using Nielson's interaction design principles

Theory:

Part - I Heuristic Evaluation

The system was evaluated based on 10 usability parameters, including user control, simplicity, consistency, accuracy, accessibility and responsiveness. The evaluation identified issues such as crowded screens, unclear medical terms, navigation difficulties and the need for better booking confirmation and user feedback.

Suggested improvements:

- simplify navigation and screen layouts.
- use clear language and familiar icons.
- provide booking confirmation and error messages.
- maintain consistent design across screens
- improve search, accessibility and help options.

Part - II Other observation

- Personalization - Provide recommendations acc. to user needs.
- Privacy - Protect user's personal and medical information.
